

SOUTHERN PUMPING

ENVIRONMENTAL POLICY

Southern Pumping Specialists is a dynamic team with a passion for pumps and pumping systems. We are committed to offering world class products and are continually analysing global trends and products to gauge their application to the conditions and requirements here in Australia.

We share responsibility for the quality of services supplied to clients, creating and maintaining a safe and healthy working environment, and ensuring that our work is completed in an environmentally responsible manner.

To meet our environmental responsibility, we will:

- maintain and update management systems to include environmental responsibility
- meet all legislative requirements and any license conditions
- minimize the detrimental impact of any design, construction or operation on the environment
- monitor and manage our impact on the environment to achieve continuous improvement
- implement resource conservation and waste minimization programs within the organization
- educate and involve staff in the achievement of our environmental objectives
- Reduce pollution from company or contractors activities
- inform clients, industry associations and the public of our environmental commitment
- ensure our goods and service providers reflect our environmental culture
- comply with the requirements of ISO 14001:2015

This EMS Policy along with our EMS targets & objectives is reviewed annually. Any improvements identified from the review will be included in the EMS Policy to increase effectiveness to ensure continual improvement.

The HSEQ Manager is authorised to ensure that the requirements of this EMS Policy and the System are implemented. Any problems that cannot be resolved between departments or personnel shall be brought to my attention for final resolution.

Daniel Wallace

Director
